

Wir suchen für einen sehr wichtigen Kunden von uns einen:

CAD Konstrukteur (m/w/d)

(1053)

Your tasks:

- Develop and optimize designs in 3D CAD software with associated CAE tools
- Validate manufacturing, assembly, and service feasibility
- Complete and release component designs and documentation, including 2D drawings
- Validate components per defined engineering requirements
- Resolve issues and concerns with cross-functional teams including engineering, supply chain, production, and service
- Participate in the sourcing process and manage engineering relationships with suppliers
- Deliver to defined schedules

Your Profile:

- Bachelor's Degree in Mechanical Engineering, or equivalent experience
- Proficiency in a 3D CAD software (CATIA is a plus)
- Experience with component design, analysis, and validation
- Great technical and interpersonal communication
- Evidence of being a self-starter and bringing projects to completion
- Prior experience in a relevant engineering field is valued, but the team has openings from entry level to expert
- Work visa for the USA is essential

What do we offer?

- **Permanent position**
- **Personal support**
- **Remuneration in line with collective agreements and above the pay scale depending on qualifications**
- **Flat hierarchies and short decision-making channels**
- **Holiday and Christmas bonus**
- **The aim is to be taken on by the customer company**
